ProofPak

Prove your skills. Get work. Build your reputation.

One place to show your skills, prove your work, find opportunities, and get paid.

ACTUAL WEBSITE · ILLUSTRATIVE PROFILE

Your work is everywhere.
Your proof shouldn’t be.

CV

Project links

Certificates

Evidence emails

Scattered files. Repeated effort.

01 **Send it all again**

The same evidence, every time.

02 **Hard to judge**

Who issued it? Is it current?

03 **Claims without context**

A CV rarely shows completed work.

One Skill Passport.
A complete picture of your work.

Show

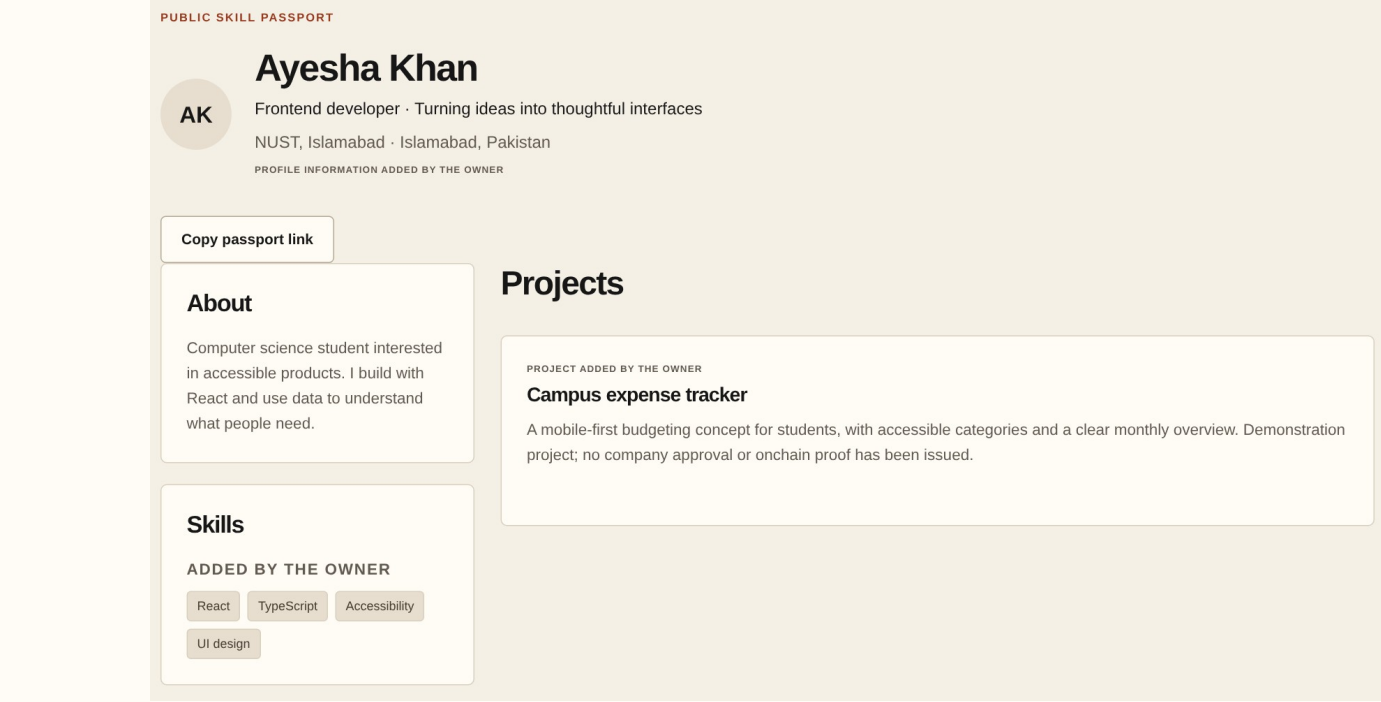

Skills, projects, experience.

Prove

Evidence + issued credentials.

Grow

Opportunities + work history.

RUNNING APP · DEMO PASSPORT

From showing your skills to building your reputation.

1 → 2 → 3 → 4 → 5

Create a Passport

Your starting point

Show Work

Projects + evidence

Find an Opportunity

Challenges + projects

Complete Work

Submit + review

Add an achievement

Separately issued

Paid projects: agreed milestones → work review → payment

Authorized organizations issue credentials separately. A payment does not create a credential.

Two important jobs for Solana.

01

Credential integrity

Record a digital fingerprint.
Check whether the record changed.

Credential → fingerprint → Solana

02

Milestone payments

Connected wallets send test USDC for approved project milestones.

Approved work → transfer → receipt

Low costs. Fast settlement. Public transaction records.

DEVNET ONLY · TEST TOKENS · LIVE END-TO-END VALIDATION STILL PENDING

More than a CV.
More than a job platform.

WITH PROOFPAK

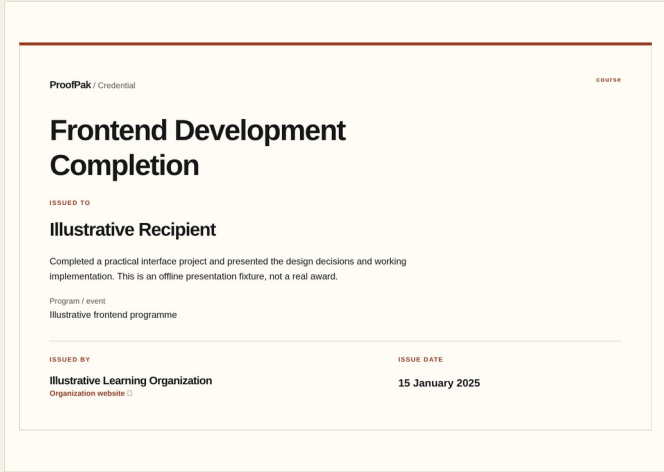

One shareable professional record.

Each new achievement adds context.

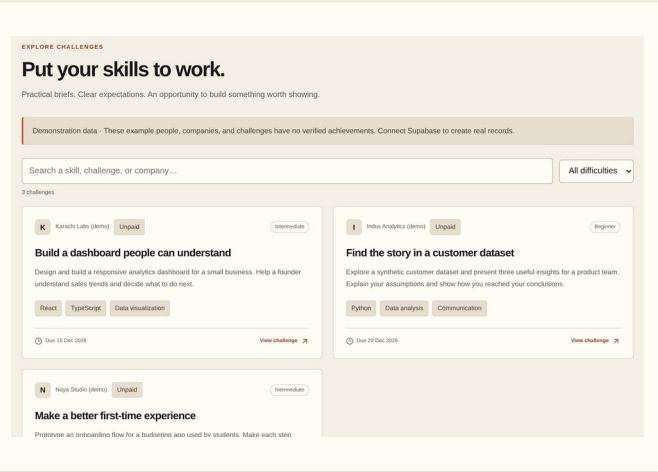

Built and ready for real-world testing.

Skill Passport

Credential presentation

Challenges

Also implemented: milestones, wallet ownership checks, devnet receipts.

Actual app captures · demo data + offline credential fixture

TESTED: 60 unit tests + 112 browser tests + local database rules

PENDING: hosted account journeys + real wallet-to-devnet acceptance tests

Starting with Pakistan’s skilled talent.

A focused first market.

Start where practical work needs a clearer professional record.

01 **Students & graduates**

Build a first professional record.

02 **Developers & freelancers**

Show practical work and progress.

03 **Companies & training teams**

Assess evidence and issue recognition.

Free for talent.
Built for organizations.

INDIVIDUALS

Free basic Skill Passport

Create. Share. Build your record.

Organizations

Potential paid tools for issuance, challenges, hiring and opportunities.

Later: possible project transaction fees

Subject to validation and applicable rules.

Start with communities.
Grow through real use.

1	**Invite**	Students, developers and professionals through relevant communities.
2	**Pilot**	Interested training teams and companies. Start with a small, agreed use case.
3	**Test**	Real issuance, applications and the complete work workflow.
4	**Improve**	Use feedback, then add more issuers and employers.

Your work should build your reputation.

A Skill Passport that grows with every project, credential, and achievement.

Next	Then	Later	Long term
Real-user testing	Company + issuer pilots	More credentials + payments	Portable professional evidence

Future mainnet payments require separate validation and release approval.

ProofPak **Prove your skills. Get work. Build your reputation.**
